I am a web developer and entrepreneur.

I am the ex-CTO and Co-Founder of a tiny Houston-based startup called One Jump (<https://onejump.org>). I co-founded One Jump right after graduating from the impressively successful and intense coding bootcamp The Iron Yard - Houston.

*While working at One Jump, I developed about 75% of the entire website built with Ruby on Rails, but I also worked on a web crawler and a web scraper that we utilized to grow One Jump's database of Summer Opportunities. Both the web scraper and the web crawler were written in Python, and I effectively improved the web scraper's runtime by a whooping **845%**!*

Unfortunately, however, One Jump suffered the same fate as most other startups: a lack of funding.

Thankfully though, my experience with One Jump has left me with a burning desire to join a small but strong team with whom I have the opportunity to grow unflinchingly.

I wholeheartedly hope that you give me one opportunity to prove that I have what it takes to become one of your most successful hires.

Technical Skills

Likes: ruby, ruby-on-rails, javascript, python, java

Experience

CTO & Co-Founder – One Jump *August 2015 – March 2016*
ruby-on-rails-4, rails-postgresql, sidekiq, javascript, ruby, ruby-on-rails, python, web-scraping, twilio-api, heroku, omniauth, devise, rails-activerecord, github

I single-handedly expanded One Jump's Ruby on Rails application as the core of the business. I also worked on a web scraper which I improved the speed of by 845%, written in Python.

Startup Co-Founder & Web Developer – Raptorbird Robotics *2012 – 2014*
php, html, css, c++

I created the startup's website with HTML, CSS, and PHP. I performed embedded electronics programming (Arduino) with its variation of C++. We successfully launched a product and sold hundreds of them on Kickstarter.

Education

A.S. Computer Science (candidate) – LoneStar College *2014 – 2015*
c++

Rails Engineering – The Iron Yard - Houston *2015 – 2015*
ruby-on-rails-4, html, css, javascript, postgresql

The Iron Yard is a 12-weeks long intensive coding bootcamp that teaches to build fast, production-ready web applications.

Projects & Interests

One Jump – <https://onejump.org/>
ruby-on-rails-4, ruby, postgresql, javascript, sidekiq, python, web-scraping, web-crawler
CTO

Writing

BryanDimas – Co-Founder & CTO of One Jump – <https://bryanelidimas.wordpress.com/>

Lately, I have been blogging about Algorithms and Data Structures which I am studying under the tutelage of my Mentor whom graduated from MIT. He is a Senior Developer at OpenStax (<https://www.openstaxcollege.org/about>).
